Happe-MDs Signs With Park Dansan to Serve as Clinical Trial Technology Partner.

Charlotte, N.C.- April 28, 2008 – Happe-MDs, an online service company specializing in providing healthcare application products and hosted services, today announced an agreement with Park Dansan to serve as their clinical trial technology partner. Happe-MDs will provide the technology services, including hosted EMR and data extraction components, of Park Dansan's Integrated Clinical Solutions program. The Park Dansan Integrated Clinical Solutions program eliminates the traditional roadblocks for physicians looking to participate in clinical drug trials and provides for the adoption of a comprehensive Electronic Medical Record system for providers that do not already have one.

The Happe-MDs service offers a variety of products and services, through its hosted environment, that provide a complete business solution for medical providers. Among those services is a completely integrated EMR solution comprised of charting, scheduling, billing and document management. Providers electing to participate in the Clinical Solutions Program will have full access to the EMR system for all of their patients, not just their patients participating in the trial. This program is a great way for providers to adopt an award winning EMR and generate significant supplemental revenue to enhance the financial health of their practice.

For information on participating in the Park Dansan Integrated Clinical Solutions program, contact Park Dansan directly at 800-766-1551. For more information about Happe-MDs visit www.happe-MDs.com or call 866-249-3481.
